

Extension and Modification to the COVID-19 Commercial Production Safety and Testing Protocol Agreement dated 4/16/21

We are writing to advise you that SAG-AFTRA and The Joint Policy Committee, LLC agreed to extend the COVID-19 Commercial Production Safety and Testing Protocol Agreement until August 31, 2022, and to make one modification effective May 16, 2022.

If vaccination is required on a commercial production, performers must be fully vaccinated as well as be "up to date" as per the CDC. Currently, the definition of "up to date" means having completed one booster shot. All other provisions relating to reasonable accommodations and protection of performer rights remain in place.

Since the protocols were implemented, they have proven extremely effective in protecting cast and crew from undue COVID risk in the workplace.

To remain successful, the system requires everyone's cooperation.
